SUMMARY

I am a dedicated QA tester with 3+ years of hands-on experience testing web and mobile applications. I perform functional, UI/UX, compatibility, regression, smoke, and sanity testing and use JIRA, Postman, SQL, and TestRail/spreadsheets for managing test cases. I have worked both as a feature tester and on the bug team, executing full testing cycles for feature releases and verifying hundreds of bug tickets to catch critical defects and stabilize releases. I thrive in agile teams and high-priority production bug verification scenarios to minimize downtime and ensure quality.

WORK EXPERIENCE

Quality Assurance Tester - Forty Degrees Celsius Inc.

Dec 2022 - Present

- Executed full manual testing cycles for 10+ feature releases as a feature tester and verified 600+ bug tickets as part of the bug team, identifying critical defects before production and contributing to stable, high-quality releases.
- Created and executed structured test cases for web and mobile applications covering functional, UI/UX, compatibility, regression, smoke, and sanity testing.
- Logged defects in JIRA with clear reproduction steps and collaborated closely with developers in agile sprints.
- Conducted exploratory and targeted regression testing to validate fixes and ensure release stability.
- Performed API spot-checks using Postman and utilized SQL queries to prepare and manage test data.
- Specialized in high-priority production bug verification, validating urgent fixes to minimize downtime and user impact.

Training and Certificate - Coders Tribe IT Solutions

Jan 2022 - Apr 2022

- Completed a 3-month software development training (OJT) focused on programming fundamentals and real-world application development.
-

EDUCATION

Bachelor of Science in Information Technology

Jun 2018 - June 2022

State University of Northern Negros

TECHNICAL SKILLS

- **Manual Testing:** Functional, UI/UX, Compatibility, Regression, Smoke & Sanity, Exploratory
- **Tools/Test Management:** JIRA, TestRail, Spreadsheets
- **API Testing:** Postman (basic)
- **Database/SQL:** Basic queries, test data setup
- **Browsers & Devices:** Chrome, Firefox, Edge, iOS, Android
- **Methodologies:** Agile / Scrum
